SUNREEF YACHTS UNVEILS THE SUNREEF SUPREME 68 EAGLE WINGS

theworldofyachts.com

The Sunreef Supreme 68 Eagle Wings is the first launch within the new Sunreef Supreme Range. This spectacular sailing catamaran was premiered at this year's Singapore Yacht Show and attracted a lot of attention. It was the first time the industry has seen a sailing catamaran under 24 meters in length with a total living space equaling 300 sqm – the kind of comfort you would normally expect to find on a super yacht.

The Sunreef Supreme's architecture revisits the way catamarans have been so far designed. A new, radical concept of the super structure allows to keep the saloon and exterior deck on the same level. As a result, Eagle Wings boasts an enormous main room surrounded with floor to ceiling glass – a smooth, seamless space opening onto the cockpit and giving direct access to the deck through sliding doors on both sides of the yacht. The exterior and interior surfaces of the boat merge into one panoramic lounging and dining area.

The yacht's 65m² custom-designed main room combining shades of smoked oak and deep blue, features a large well equipped galley and a dining area with easy access to storage and one of the boat's two wine coolers. A pop-up TV is installed in the cabinet facing the large table for ten. Placed amidships is a vast lounge expertly utilizing the boat's impressive beam. The central seating area with immense sofas is surrounded with an onyx-clad bar to portside and a card table to starboard. As Eagle Wings puts the emphasis on music and entertainment, a karaoke system is installed and a large TV drops down from the saloon's ceiling. An upright piano is also placed in the bow part of the room.

The layout comprises two beautifully appointed guest cabins with large private bathrooms with stone tile finishing and two voluminous master suites. The portside staircase features a custom-made stairlift as to facilitate cabin access for one of the Owner's older family members. The master cabins are spacious retreats, fitted with large double beds, a sofa, a drop-down TV, a generous dressing and bathroom. The crew quarters on Eagle Wings are roomy and comfortable. They will sleep three people in the aft portside cabin and one in the boat's ample forepeak.

Eagle Wings features an immense flybridge topped with an elegant bimini. This scenic area is fitted with a bar, a large sofa and mattresses to obtain a vast dining and lounging space of 65m². The yacht's front terrace is the place to relax on the large sun pads or to enjoy a bath in the Jacuzzi.

The boat is equipped with an aft garage – featured on all the Sunreef Supreme 68's. This voluminous space allows to conveniently store a 5m tender and up to two jet-skis, diving gear and sails. The garage door, when lowered, levels with the yacht's aft platforms to create an exterior lounging and sunbathing space. The boat's mast is fixed at flybridge level with a carbon-made transversal arch-shaped beam – an innovative system designed to keep the saloon's surface entirely open.

Sunreef Yachts' latest concept was created to respond to a growing demand for more personalized, comfortable and technically advanced units and embodies a very specific philosophy of yacht creation. The Sunreef Supreme is an audacious line of yachts and superyachts designed to become the world's most comfortable and spacious range of lifestyle-oriented boats.
